VOLUNTARY ANNOUNCEMENT – REGULAR APPROVAL OF DEUREMIDEVIR HYDROBROMIDE TABLETS BY THE NATIONAL MEDICAL PRODUCTS ADMINISTRATION

This announcement is made by Shanghai Junshi Biosciences Co., Ltd.* (上海君實生物醫藥科技股份有限公司) (the "**Company**") on a voluntary basis.

The board (the "**Board**") of directors (the "**Directors**") of the Company is pleased to announce that Shanghai Vinnerna Biosciences Co., Ltd.* (上海旺實生物醫藥科技有限公司), a subsidiary controlled by the Company, has received the Notice of Approval for Supplemental Drug Application* (《藥品補充申請批准通知書》) issued by the National Medical Products Administration (the "**NMPA**"). The NMPA has approved for the conditional approval for the indication for Deuremidevir Hydrobromide Tablets (氫溴酸氘瑞米德韋片) (trade name: MINDEWEI*(民得維®), product code: VV116/JT001) as the treatment of adult patients with mild to moderate coronavirus disease 2019 ("**COVID-19**") to be converted to regular approval. Relevant details are set out below:

ABOUT DEUREMIDEVIR HYDROBROMIDE TABLETS

Drug name: Deuremidevir Hydrobromide Tablets
Application matter: Application for conversion from conditional approval to regular approval for marketing
Acceptance No.: CYHB2401370
Notice No.: 2025B00098
Marketing Authorization Holder: Shanghai Vinnerna Biosciences Co., Ltd.*
Review conclusions: According to the Drug Administration Law of the People's Republic of China* (《中華人民共和國藥品管理法》) and relevant requirements, upon review, the application for the drug satisfied the relevant requirements for drug registration and the following supplemental application matters are approved: 1. It is agreed that the research information submitted by the applicant under the condition for the marketing of the drug has satisfied relevant requirements; 2. It is agreed that the approval for the drug shall be converted from conditional approval to regular approval for marketing.

On 28 January 2023, based on a multi-center, double-blind, randomized, placebo-controlled phase III clinical study (JT001-015 Study, NCT05582629) conducted among mild to moderate COVID-19 patients with or without high risk for progression to severe COVID-19, MINDEWEI received the conditional approval for marketing by the NMPA.

The regular approval for MINDEWEI is mainly based on a number of clinical and non-clinical studies, including the JT001-015 Study and a real-world study enrolling nearly 8,000 patients. Study results have shown that, among patients with mild and moderate COVID-19, MINDEWEI significantly facilitates symptoms alleviation and resolution, shortens course of disease, accelerates the virus to negative, and reduces the incidence of severe COVID-19 cases or all-cause death, especially for elderly and high-risk patients. Among patients with mild and moderate hepatic or renal dysfunction, MINDEWEI exhibited satisfactory safety and tolerability, and patients do not need to adjust, or only need to slightly adjust, their dosage when taking the medication. Meanwhile, the pharmacological study showed that MINDEWEI basically does not have drug-drug interactions, greatly reducing medication contraindications, effectively ensuring the combined use of medications by patients, and providing a safer and more effective choice for groups with special needs.

MINDEWEI is an oral nucleoside analog drug that inhibits the replication of SARS-CoV-2. Related studies have shown that MINDEWEI exhibited significant antiviral effects against both the original SARS-CoV-2 strain and mutant strains, including Omicron XBB.1.16, EG.5 and JN.1, and exhibited no genetic toxicity. MINDEWEI was jointly developed by Shanghai Institute of Materia Medica, Chinese Academy of Sciences* (中國科學院上海藥物研究所), Wuhan Institute of Virology, Chinese Academy of Sciences* (中國科學院武漢病毒研究所), Xinjiang Technical Institute of Physics and Chemistry, Chinese Academy of Sciences* (中國科學院新疆理化技術研究所), Central Asian Center of Drug Discovery and Development of Chinese Academy of Sciences* (中國科學院中亞藥物研發中心)/China-Uzbekistan Medicine Technical Park (the Belt and Road Joint Laboratory of the Ministry of Science and Technology)* (中烏醫藥科技城(科技部"一帶一路"聯合實驗室)), Lingang Laboratory* (臨港實驗室), Suzhou Vigonvita Biomedical Co., Ltd.* (蘇州旺山旺水生物醫藥有限公司) and the Company. MINDEWEI was included in the scope of provisional medical insurance reimbursement in January 2023, and has been officially included in the National Reimbursement Drug List since January 2024.

RISK WARNING

As pharmaceutical products are characterized as being of high technology, of high risks and with high added value, and the commercialization of drugs is subject to certain uncertainties, investors are advised to make cautious decisions and pay careful attention to investment risks. The Company will actively pursue the described project and fulfill its information disclosure obligations in a timely manner for subsequent progress in strict compliance with relevant regulations.

By order of the Board
Shanghai Junshi Biosciences Co., Ltd.*
Mr. Xiong Jun
