VOLUNTARY ANNOUNCEMENT – JT118 RECEIVED THE NOTICE OF APPROVAL FOR CLINICAL TRIAL

This announcement is made by Shanghai Junshi Biosciences Co., Ltd.* (上海君實生物醫藥科技股份有限公司) (the "**Company**") on a voluntary basis. Reference is also made to the overseas regulatory announcement of the Company dated 2 September 2025.

The board (the "**Board**") of directors (the "**Directors**") of the Company is pleased to announce that Shanghai JunTop Biosciences Co., Ltd.* (上海君拓生物醫藥科技有限公司), a subsidiary of the Company, has received the Notice of Approval for Clinical Trial* (《藥物臨床試驗批准通知書》) issued by the National Medical Products Administration. The investigational new drug application for the JT118 injection (project code: "**JT118**") has been approved. Relevant information is as follows:

ABOUT JT118

Drug name: JT118 injection
Application matter: Clinical Trial of Domestic Production Registration of Pharmaceutical Product
Acceptance No.: CXSL2500478
Applicant: Shanghai JunTop Biosciences Co., Ltd.*
Review conclusion: According to the Drug Administration Law of the People's Republic of China* (《中華人民共和國藥品管理法》) , the Vaccine Administration Law of the People's Republic of China* (《中華人民共和國疫苗管理法》) and relevant regulations, upon review, the application for clinical trial of JT118 injection accepted on 11 June 2025 meets the relevant requirements for drug registration, and it has been approved to conduct clinical trials for the prevention of monkeypox virus infection.

JT118 is a "two-in-one" recombinant protein vaccine composed of a tandem fusion of monkeypox virus antigens A35 (an extracellular enveloped virus antigen) and M1 (an intracellular mature virus antigen), and is intended mainly for the prevention of monkeypox virus infection. Monkeypox is a zoonotic viral disease caused by infection with the monkeypox virus. The monkeypox virus is a member of the Orthopoxvirus of the Poxviridae. During the virus replication process, two types of virus particles with different morphologies are produced: extracellular enveloped virus and intracellular mature virus, which are both infectious. JT118 not only retains the epitope structure of two natural antigens, A35 and M1, but also greatly increases the molecular weight through multi-antigen fusion, which is more conducive to immune stimulation. Preclinical studies demonstrate that administration of JT118 elicits high-titer binding antibodies, neutralizing antibodies against vaccinia virus/monkeypox virus, and robust cellular immune activation in both small and large animal models. The vaccine confers significant protection against vaccinia virus/monkeypox virus infection in these models, with a favorable safety profile.

In October 2023, the Company reached cooperation with Peking University*（北京大學）, the Institute of Microbiology, Chinese Academy of Sciences* (中國科學院微生物研究所), Shanxi Academy of Advanced Research and Innovation* (山西高等創新研究院) and Beihang University*（北京航空航天大學）to jointly develop a recombinant protein vaccine for monkeypox. As of the date of this announcement, no vaccine for preventing monkeypox virus infection has been approved for marketing in China.

RISK WARNING

Due to the high-tech, high-risk and high-value-added characteristics of pharmaceutical products, there are substantial risks and uncertainties in the process of drug research, development and commercialization. These many stages make it susceptible to uncertainties and therefore, investors are advised to make cautious decisions and pay careful attention to investment risks. The Company will actively pursue the above research and development project and fulfill its information disclosure obligations in a timely manner for subsequent progress of the project in strict compliance with relevant regulations.

By order of the Board of
Shanghai Junshi Biosciences Co., Ltd.*
Mr. Xiong Jun
Chairman

Shanghai, the PRC, 2 September 2025

As at the date of this announcement, the Board of Directors of the Company comprises Mr. Xiong Jun, Dr. Li Ning, Dr. Zou Jianjun, Mr. Li Cong, Mr. Zhang Zhuobing, Dr. Yao Sheng, Dr. Wang Gang and Dr. Li Xin as executive Directors; Mr. Tang Yi as a non-executive Director; and Mr. Zhang Chun, Dr. Feng Xiaoyuan, Dr. Yang Yue, Mr. Li Zhongxian and Ms. Lu Kun as independent non-executive Directors.
