VOLUNTARY ANNOUNCEMENT AGREEMENT WITH VISARA TO DEVELOP AND COMMERCIALIZE VIS-101 IN GREATER CHINA AND OTHER ASIAN MARKETS

This announcement is made by Everest Medicines Limited (the "**Company**") on a voluntary basis.

The board (the "**Board**") of directors (the "**Directors**") of the Company is pleased to announce that on 28 October 2025, the Company entered into an agreement (the "**Agreement**") with Visara, Inc. ("**Visara**"), a subsidiary of NovaBridge Biosciences (formerly known as I-Mab, and is a company listed on the Nasdaq Global Market trading under the symbol "NBP"), pursuant to which Visara irrevocably assigned to the Company an exclusive license to develop, manufacture and commercialize VIS-101, a novel bifunctional biologic targeting VEGF-A and ANG-2 that is more potent and could potentially provide more durable treatment benefits for patients with wet age-related macular degeneration, diabetic macular edema, and retinal vein occlusion than first generation treatment, in Greater China, Singapore, South Korea and certain Southeast Asian countries.

Under the assigned exclusive license, the Company's payment obligations include: (i) an upfront payment of US$7 million (equivalent to approximately RMB49.7 million) and reimbursement of up to RMB24.0 million for out-of-pocket expenses; (ii) potential development and sales milestone payments of up to US$89.0 million (equivalent to approximately RMB632.0 million; and (iii) potential net sales royalties.

The Directors are of the view that the strategic collaboration between the Company and Visara would bring in a highly differentiated and commercially attractive asset that adds to the Company's late-stage product pipeline. VIS-101 also allows the Company to expand into ophthalmology, a competitively attractive therapeutic area where there are significant unmet medical needs.

As the highest applicable ratio in respect of the transaction contemplated under the Agreement is less than 5%, such transaction does not constitute a disclosable transaction of the Company and is fully exempt from the reporting, announcement and shareholders' approval requirements under Chapter 14 of the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited.

INFORMATION ABOUT VIS-101

VIS-101 is a novel bifunctional biologic targeting VEGF-A and ANG-2 that is more potent and could potentially provide more durable treatment benefits for patients with wet age-related macular degeneration, diabetic macular edema, and retinal vein occlusion than first generation treatment. VIS-101 has completed initial safety and dose-escalation studies in both the United State of America and China, and is currently completing a randomized, dose-ranging Phase 2 study in China. VIS-101 is anticipated to be Phase 3-ready in 2026.

INFORMATION ABOUT VISARA

Visara is a clinical-stage biopharmaceutical company focused on developing ophthalmic therapeutics for serious eye disorders. It is a subsidiary of NovaBridge Biosciences, which is a company listed on the Nasdaq Global Market trading under the symbol "NBP". NovaBridge Biosciences is a global biotechnology platform company committed to accelerating access to innovative medicines. It combines deep business development expertise with agile translational clinical development to identify, accelerate, and advance breakthrough assets. Its differentiated pipeline is led by givastomig, a potential best-in-class, bispecific antibody (Claudin 18.2 x 4-1BB), and VIS-101, a second-in-class, potentially best-in-class bifunctional biologic, targeting VEGF-A and ANG-2.

Cautionary Statement: The Company cannot guarantee that it will be able to develop, or ultimately market, the above drug candidate successfully. Shareholders and potential investors of the Company are advised to exercise due care when dealing in the shares of the Company.

By order of the Board
Everest Medicines Limited
Yifang Wu
Chairman and Executive Director
