VOLUNTARY ANNOUNCEMENT
CLOSING OF EXCLUSIVE LICENSE AND COLLABORATION AGREEMENT WITH TRAVERE

This announcement is made by Everest Medicines Limited (the "**Company**") on a voluntary basis. Reference is made to the announcement of the Company dated 2 June 2026 (the "**Announcement**") in relation to the exclusive license and collaboration agreement with Travere Therapeutics, Inc. Unless otherwise stated, capitalised terms used in this announcement shall have the same meanings as those defined in the Announcement.

The Board is pleased to announce that the closing took place in accordance with the terms of the Agreement. The Licensor will receive an upfront payment of US$112.5 million and is eligible to receive up to US$1.03 billion in development, regulatory, and commercial milestone payments across up to five indications, as well as tiered royalties at percentages ranging from the high single-digit to double-digit based on future annual net sales thresholds.

About Travere

Travere is a biopharmaceutical company with its mission "In Rare For Life", and that comes together every day to help patients, families and caregivers of all backgrounds as they navigate life with a rare disease. On this path, Travere knows the need for treatment options is urgent — that is why Travere's global team works with the rare disease community to identify, develop and deliver life-changing therapies. In pursuit of this mission, Travere continuously seeks to understand the diverse perspectives of rare patients and to courageously forge new paths to make a difference in their lives and provide hope — today and tomorrow. For more information, visit travere.com.

About civorebrutinib (EVER001)

Civorebrutinib (also known as EVER001) is a next-generation covalent reversible Bruton's tyrosine kinase (BTK) inhibitor in development globally for the treatment of renal diseases. BTK is an essential component of the B-cell receptor signaling pathways that regulate the survival, activation, proliferation, and differentiation of B lymphocytes. Targeting BTK with small molecule inhibitors has been demonstrated to be an effective treatment option for B-cell autoimmune diseases.

We cannot guarantee that civorebrutinib will ultimately be successfully developed and marketed. Shareholders and potential investors of the Company are advised to exercise due care when dealing in the shares of the Company.

By order of the Board
Everest Medicines Limited
