VOLUNTARY ANNOUNCEMENT

ACCEPTANCE OF THE NEW DRUG APPLICATION AND PRIORITY REVIEW GRANTED BY NMPA TO MRG003 FOR THE TREATMENT OF R/M NPC

A. INTRODUCTION

This announcement is made by Lepu Biopharma Co., Ltd. (the "**Company**") on a voluntary basis.

The board of directors of the Company (the "**Board**") is pleased to announce that we have received the Acceptance Notice (《受理通知書》) issued by China National Medical Products Administration ("**NMPA**") in relation to the acceptance of the New Drug Application ("**NDA**") of our drug candidate MRG003, an antibody drug conjugate ("**ADC**") drug candidate targeting epidermal growth factor receptor ("**EGFR**"), for the treatment of recurrent or metastatic nasopharyngeal cancer ("**R/M NPC**"). MRG003 has also been granted the priority review by the Center for Drug Evaluation ("**CDE**") of NMPA (the "**Priority Review**").

Previously, MRG003 has already been granted Breakthrough Therapy Designation ("**BTD**") by the CDE, the BTD, the Orphan-drug Designation ("**ODD**") and the Fast Track Designation ("**FTD**") by the Food and Drug Administration of the United States (the "**FDA**") for the treatment of R/M NPC.

B. ABOUT MRG003

MRG003 is an ADC comprised of an EGFR-targeted monoclonal antibody conjugated with the potent microtubulin inhibiting payload monomethyl auristatin E via a valine-citrulline linker. It binds specifically with high affinity to EGFR on the surface of tumor cells, releases the potent payload upon internalization and lysosomal protease cleavage of the linker and results in tumor cell death.

EGFR is highly expressed in colorectal cancer, lung cancer, head and neck cancer and other malignant solid tumors, and is expressed in 89% advanced NPC. Therefore, EGFR is an important target for cancer treatment.

C. IMPACT ON THE COMPANY

The acceptance of drug registration application of MRG003 and the Priority Review granted by NMPA mark a significant milestone in the commercialization of MRG003, and which together with the BTD of MRG003 granted by the CDE will also accelerate the evaluation process. In the future, the Company will fully promote the commercialization of MRG003, which will have a positive impact on the operating results and further enhance the competitiveness of the Company.

After the acceptance of drug registration application for MRG003 with NMPA, MRG003 shall be subject to the procedures of technical evaluation, clinical trial onsite inspection and production site inspection, and will be commercialized only after obtaining the NDA approval.

Warning: There is no assurance that the MRG003 will ultimately be successfully developed and marketed by the Company. Shareholders of the Company and potential investors are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
Lepu Biopharma Co., Ltd.
Dr. Pu Zhongjie
Chairman of the Board and Executive Director

Shanghai, the PRC
September 27, 2024

As at the date of this announcement, the Board comprises Dr. Pu Zhongjie (chairman) and Dr. Sui Ziye (chief executive officer) as executive Directors; Mr. Yang Hongbing and Ms. Pu Jue as non-executive Directors; and Mr. Zhou Demin, Mr. Yang Haifeng and Mr. Fengmao Hua as independent non-executive Directors.
